UCSC Course Finder - Sprint 1 Report

Ian Zenter (PO)
Justin Ewing (Scrum)
Umit Ceylan
Joe Rozo

Release 1.27.16-0.1

Actions to stop doing - Not a whole lot. It's not so much about what the team needs to stop doing and more about what the team needs to start doing to be productive. Nothing that is being done is hindering our progress at the moment.

Actions to start doing - Start holding longer group work sessions for better collaborative efforts. Have better defined tasks per person so that each person knows what their job is.

Actions to keep doing - Keep communicating through slack and expanding on our ideas about what are product should contain.

Work Completed

- As a developer, I want to easily set up a server environment
- As a developer, I want to quickly deploy and update a database
- As a user, I want a touch friendly UI
- As a user, I want a scalable UI
- As a developer, I want to efficiently query my database

Work Not Completed

- As a user, I want basic search functionality
- As a user, I want a mobile friendly UI
